### DIRECTIONS FOR USE

1. Always keep the dispenser in an upright position during use.
2. Turn the spray nozzle clockwise 90° so the nozzle is at a right angle to the dispenser bottle.
3. **THE FIRST TIME THE DISPENSER IS USED:** Hold the nozzle over a sink and compress the plunger one or two times until spray is discharged.
4. Place the nozzle of the dispenser bottle in the side of the mouth or under the tongue.
5. Fully depress the plunger three times taking care to dispense as much extract as possible.
6. After dispensing the dose, return the spray nozzle to its original position and store until the next scheduled dose. (Refrigeration recommended.)

\* Clients/owners dispensing treatment should contact their veterinarian with questions and to reorder vials. It is important to avoid food/drink for 10-15 minutes before and after the dose in order to better aid absorption.

VETERINARIANS ONLY, PLEASE.

For questions or to place an order call 888.708.PAWS (7297)

Pet owners, please visit our website at  
[www.allerpaws.com](http://www.allerpaws.com) or consult your veterinarian.

Refrigeration recommended.

## Allergenic Extract Oral Allergy Treatment (Immunotherapy) FOR VETERINARY USE ONLY

This product is for animals only. Not for human use.

### TREATMENT SET

Your treatment set consists of 1 x 12 ml Starter Dose vial (1 month supply) and 1 x 32 ml or 2 x 32 ml Maintenance Dose vial(s) (4 months supply each). You will use the Starter Dose vial for the first month or what is called the "build up phase" of oral allergy treatment, followed by the Maintenance Dose vial(s) for approximately four to eight months.

A 2-vial treatment set lasts a total of 5 months.

A 3-vial treatment set lasts a total of 9 months.

### Suggested Dosage Schedule

Using the Starter Dose Vial (small yellow label vial) administer 3 sprays into side of mouth or under the tongue, 7 days/week for 4 weeks.

NOTE START DATE HERE: \_\_\_\_\_

After four weeks, begin dosing with the Maintenance Dose (large green label vial), administering 3 sprays into side of mouth or under the tongue, 6 days/week. (Each vial will last approximately 4 months.) Use each vial until empty.

### IMPORTANT - TO AVOID INTERRUPTING YOUR PET'S TREATMENT, CONTACT YOUR VETERINARIAN TO REORDER AS INDICATED BELOW:

For a 2-vial treatment set, place order 4 months from start date.

For a 3-vial treatment set, place order 8 months from start date.

NOTE REORDER DATE HERE: \_\_\_\_\_

Please allow three weeks for delivery.

\* Clients/owners dispensing treatment should contact their veterinarian with questions and to reorder vials. It is important to avoid food/drink for 10-15 minutes before and after the dose in order to better aid absorption. Observations can be recorded and noted. Try not to miss a daily dose. In the event a dose is not given for any reason up to 3 days, continue with the usual volume dose. Never double or triple the recommended amount "to catch up"! Remember, we are gradually increasing your pet's immune tolerance.

Refrigeration recommended.
